Like Dr. Jenny Ruiz, become seasoned to build a more equitable and diverse research. “I was inspired by several sessions I attended during the meeting, specifically those dedicated to IDEA experiences and mentorship connections through the IDEA program. By reimagining the cancer experience, we can accelerate research for every type of cancer, from the common to the rare. In the process, you help ensure that every patient has access to the latest treatments and cures,” said Dr. Alex Herrera (2014), a former Young Investigator Award recipient. “This year’s meeting has set the stage for the next generation of cancer care.”

Every year in Chicago, ASCO hosts the world’s largest gathering of oncology professionals from around the world. When Generosity Drives Discovery, you fuel innovation, and your support is making a difference. You are changing the course for people with cancer. Together we are witnessing the Acceleration of Research, with more than 20,000 presentations at ASCO 2023. More than ever, the future of cancer care depends on your generosity.

2023 Impact Report

Dr. Fidel Rubagumya with his mentor, Dr. Alex Herrera (2014) showed how a new therapy reduces risks of cancer-related death for patients with advanced-stage lymphoma. Dr. Roy Herbst (1997) shared how a new drug shows promise for prolonging the lives of patients with lung cancer. Dr. Deborah Schrag (1998) uncovered an effective treatment for patients with advanced-stage rectal cancer. This year, Dr. Chi Viet with Brian (left) and Frank (right) discussed cancer’s intergenerational impact.

When Generosity Drives Discovery

You Fueled Discovery and Conquer Cancer’s Young Investigator Award (YIA), a first that proves that the deep impact of your generosity is more than the sum of its parts. The 2023 presenters included: Dr. Jyoti Patel, a clinical oncologist and editor-in-chief of Cancer.Net. Together with Dr. Jyoti Patel, you are changing the course for people with cancer. The 2023 grant recipients include: Dr. Chi Viet, Dr. Alex Herrera, Dr. Fidel Rubagumya, and several others. These leaders, along with fellow recipient Dr. Nikhil C. Parag, are embracing opportunities to accelerate research breakthroughs and empowering people everywhere to conquer cancer. In 2023, Conquer Cancer awarded more than $10 million to further lifesaving research.

Lifesaving Options for Anya

There was a time when the odds of surviving a stage IV oral cancer diagnosis were significantly lower than they are today. More people are surviving cancer today than ever before, thanks to Conquer Cancer donors. As a result, we are seeing progress in research that will continue.

Every Award Tells a Story

Dr. Chi Viet with Brian (left) and Frank (right)

The global impact of what we do at the American Society of Clinical Oncology is immeasurable. The impact of your generosity is the key to opportunities to accelerate research breakthroughs and empowering people everywhere to conquer cancer. By providing more than $10 million for research and education in 2023, you are changing the course for people with cancer.

Researching at the Intersection of People, Science, and Impact

Conquer Cancer’s 2023 Annual Report

“Conquer Cancer has always been a leader in bringing evidence-based research and care to people with cancer,” said Dr. Alex Herrera (2014). “We are committed to ensuring that every patient has access to the latest treatments and cures.”

Our donors are the heart of what we do at Conquer Cancer. In 2023, we awarded more than $10 million to further lifesaving research. This is made possible through the generosity of our donors, who provided more than $35 million in 2023.

Lifesaving Options for Anya

As a result of your generosity, your support is making a difference. Together, we are witnessing the Acceleration of Research, with more than 20,000 presentations at ASCO 2023. More than ever, the future of cancer care depends on your generosity.

2023 Financials

Revisit the story of 19-year-old Anya and how she and her team are bringing better treatments and cures to the people who need them around the world. But we could not do it without your help—and your leadership has been key. Your support will continue to ensure that every patient has access to the latest treatments and cures.
